## PROFILE

I am a frontend developer and MSCS student with hands-on experience in React-based applications and modern UI frameworks. Skilled in delivering scalable, user-focused solutions with a focus on maintainability and performance.

## EXPERIENCE

Alpha Resources                                                                                     *Lahore, Pakistan*

**Frontend Web Developer**                                                           Dec'2024-Present

- Built a Direct School Management system from scratch, enabling automated invigilator scheduling for 50+ campuses and reducing manual work by an estimated 40%.
- Collaborated with a team of 4 developers to launch 4 production-grade websites, improving delivery speed by 25%.
- Adapted quickly to agile workflows in a fast-paced development cycle.
- Led UI component planning sessions, improving team coordination and reducing rework.

Bitstorm Solutions                                                                            *Gujranwala, Pakistan*

**Web Developer Internee**                                                         Sep'2024 – Nov'2024

- Worked on a General Sales Management Project which is aimed to build for any warehouse containing business.
- Gained exposure to the full Software Development Life Cycle (SDLC) through on-site collaboration.

## SKILLS

**Technical:** React, JavaScript, Tailwind CSS, Java, TypeScript, Next, Python, SQL, Machine Learning

**Tools:** Git & GitHub, MySQL, VS Code, Postman, Vercel, Discord, Chrome Dev Tools

**Soft:** Critical Thinking, Problem Solving, Adaptability, Time management, Leadership, Teamwork, Accountability

## CERTIFICATIONS

- Certificate for Internship Completion is listed in my LinkedIn profile– Nov'24 (*verify*)
- Meta certified Advanced React Developer – May'24 *(verify)*
- Meta certificate for React Basics – Mar'24 *(verify)*

## PROJECTS

**Direct School Management**                                                        Dec'24 – Mar'2024

- It was a fully customized web App for Beaconhouse School System (BSS) to manage their invigilators for examination.
- Developed the frontend architecture from the ground up using React, Tailwind and Zustand.
- Engineered a responsive frontend which is streamlining invigilator assignment and onboarding for over 50 campuses.

**Ai Paper Generator**                                                                        Mar'24 – Apr'24

- Developed a full-featured AI-powered educational platform that streamlines the creation and management of examination papers, serving educational institutions by automating paper generation based on curriculum requirements, along with rating and editing features to enhance generated paper's quality.

## EDUCATION

GIFT University                                                                               *Gujranwala, Pakistan*

**Bachelor of Computer Science** CGPA 3.97/4.00 – Ranked 1st (Topper of Batch of 140 students)          2021 – 2025

## ACHIEVEMENTS

- Runner-up in regional hackathon (InnovateX).
